

# GRAIN CART SCALE PACKAGES

Maximize your grain cart's performance with the new, exclusive Unverferth scale packages. In addition to providing crop yield information, they can also be used to compare field data, keep your truck loads within legal limit, save time by weighing in the field and a host of other time- and labor-saving benefits.

The new model 410 and 510 scale packages, available on Brent and Unverferth grain carts, provide the latest in electronic components and ease-of-use features to make your harvest run smoothly. Best of all, they can be factory installed or easily added at a later time.

## MODEL 410

This unit is specifically designed for ease of use and maximum productivity while providing key features. The patent-pending START/STOP button makes using and training others quickly.

To use, simply press START/STOP to display a temporary zero. Then when unloaded, press the START/STOP button to record the load data, including weight, time/date and field reference. Push the START/STOP button again time to show weight remaining in the cart. This data can then be sent to an optional attached printer or Data Downloader (DDL) for advanced record keeping. The 410 indicator also provides the ability to:

- Assign, view and change six character field information
- Accumulate weights within a field

Use your Unverferth model 410 or 510 scale package to:

- Measure crop yields
- Compare individual fields, soil types, hybrids, fertilizers, tillage equipment and methods
- Know the weight of grain going in to and out of on-farm storage
- Save time by weighing in the field versus using a platform scale
- Keep your truck's weight legal
- Measure crop damage for insurance documentation
- Document each and every load
- Eliminate guesswork and provide peace of mind
- Provide concrete data for making factual decisions for the next year's crop

## MODEL 510

The model 510 indicator from Unverferth also features the patent-pending START/STOP button for ease of use. Additionally, the large, multi-line display provides more detailed information such as:

- Combine CHECK button to help calibrate the combine's yield monitor
- Alpha-numeric keyboard for easily editing or changing field information
- Accumulation of weights per field entry
- Ability to download field information from your computer to the scale monitor and then back to the computer
- Stores a complete season's harvest data in the monitor's memory
- Included 1GB USB flash drive permits easy transferring of data
- Included PC software allows the computer to capture the data and then organizes it into reports in Microsoft Excel or Adobe PDF format.

If you already own an Unverferth or Brent Grain cart with bolt-on type spindles, adding the productivity-enhancing features of the model 410 or 510 scale package is easily performed. With the three-point weighing system, simply replace the cart's spindles and hitch with those provided, run the wiring and you will be ready to weigh. Scale packages include all necessary components for easy installation.

When choosing your brand and model of grain cart, ask your dealer about adding the productivity enhancing features of the exclusive Unverferth model 410 or 510 scale package to your cart.
